
Bake Sale MATH CHALLENGE

The school SRC bake sale is happening next week and we need to make sure we will have enough baking to feed all the hungry students. Each recipe makes a different amount of baking, so we need to plan ahead on how many batches of each kind of baking we will need.

Bake Sale Plan

- Sugar Cookies: We need 110, a batch makes 25.
- Cupcakes: We need 190, a batch makes 50.
- Lemon Squares: We need 50, a batch makes 15.
- Donuts: We need 60, a batch makes 10.

- Chocolate Chip Cookies: We need 125, a batch makes 20

How many batches of each treat do we need to ensure we have enough?

Will some treats have leftovers? If so, how many?

Create a bar graph showing how many treats we need for the bake sale.
